They also faulted him for taking too many smoke breaks — they had reviewed an entire day’s video and tracked his smoking to the minute — and for failing to properly document his purchase of two Diet Pepsis.

In addition to hepatitis risks faced by medical professionals, contact with blood also puts such workers at risk of HIV exposure, which is treated by specialty antiviral drugs such as Truvada and Kaletra, experts say.

In recent years, Bristol-Myers was able to mask its research shortfall by cheaply licensing promising drugs from the government, universities or other companies and using its marketing might to turn them into huge sellers.

There is substantial evidence that a combination of CT, EUS, and PET scan is an ideal package for preoperative imaging, accompanied by a staging laparoscopy for lower-third or gastroesophageal junction tumours.

The classic Vaudeville version of this is “When Did You Stop Beating Your Wife?” For the uninitiated, the trick is that if you aren’t a wife-beater, there’s no correct way to answer the question.

Studies have shown that as many as half of Korean immigrants living in the United States practice some form of traditional healing at least part of the time, often concurrently with Western techniques.
